IDENTITY & PRODUCT GUIDELINES

Jejak Balik

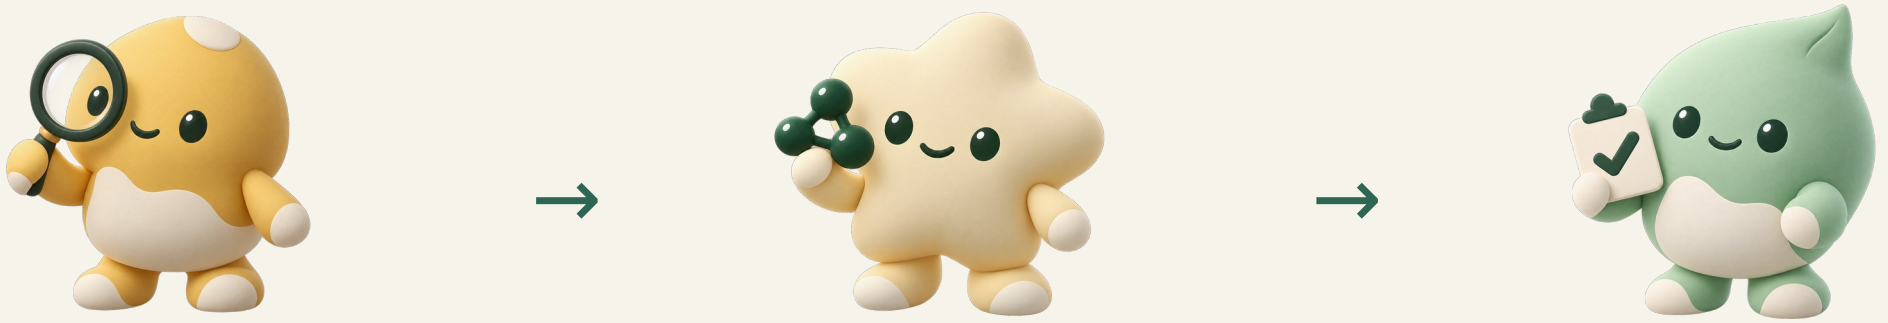

Mengalirkan kembali nilai elektronik.

A warm operating system for electronics collection, traceable handoffs, and recovery.

VERSION 1.0 / OCTOBER 2026

Purpose & audience

Make each return understandable, from a household request to a recorded outcome.

Households

Arrange a pickup and see what happens next.

Coordination

Review requests, capacity, routes, and exceptions.

Recovery

Record custody, inspection, and the recovery pathway.

A useful next step is always visible. Operator decisions remain explicit.

Brand character

Warmth supports the work. Clarity earns trust.

Warm	“Penjemputan terjadwal, tanpa biaya.”
Capable	“Tinjau penanganan baterai.”
Clear	“Permintaan siap ditinjau.”
Circular	“Kehidupan kedua dimulai di sini.”

The return-path mark

An open loop with a visible point of origin.

Return

The left-facing turn signals a journey back into use, rather than a one-way disposal.

Trace

The separate clay node identifies a starting point. A continuous line carries it forward.

Rounded geometry connects the identity to the miniature world.

Lockups & approved variants

Choose the lockup that preserves the wordmark's legibility.

Primary horizontal

Stacked

Reverse on forest

Clear space & minimum size

Keep one stroke width of breathing room around the mark.

64u mark · 8u clear space

Horizontal lockup: 128 CSS px minimum

20 px minimum

Use the supplied favicon for 16 px contexts.

Palette

Warm surfaces, forest actions, and restrained semantic color.

Canvas
#F6F3EB

Surface
#FFFEFA

Forest
#2D6753

Clay
#A95135

Text
#25352D

Border
#DDDCD2

White text on forest actions

Dark status text on pale backgrounds

Typography

Plus Jakarta Sans — one family for a coherent product.

Aa

0123456789

Tabular numerals
for comparable metrics

Heading / 700

Every item has a next step.

Body / 400

A pickup becomes useful when the request, route, and handoff stay connected.

UI scale: 12–13 labels · 14–16 body · 18–22 compact headings · 28–36 page titles

Layout & spacing

A 4 px rhythm keeps dense information calm.

Desktop

40 px controls
12–16 px card radii
Clear left-to-right hierarchy

Mobile

44 px touch targets
Full-width sheets and actions
One primary task per view

Components

Shared behavior matters as much as shared appearance.

Review request

View details

Collected

Needs review

Button

One clear primary action.
Visible keyboard focus.

Inspector

Identity, status, related data,
next action, and a clear close path.

Tables align values; dialogs state consequences; empty states offer a next step.

The operating team

Seven original characters, each with a distinct responsibility.

Scout	Rute	Mitra	Pilah	Dampak	Jaga	Kendali
Pickup intelligence	Route planning	Partner coordination	Device triage	Outcome reporting	Safety & exceptions	Operations coordination

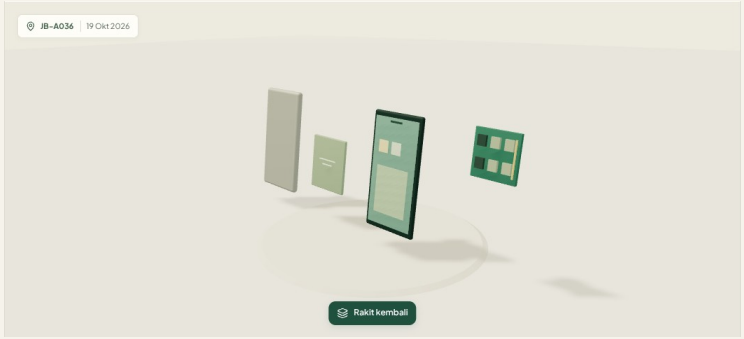

Artwork establishes identity; the interface communicates live task state.

World language

A cared-for place makes collection and recovery legible.

City overview

Soft light, quiet ground, clear routes and selection.

Hub zones

Work areas connect each item to its next pathway.

Device inspection

Separated components make inspection concrete.

3D application views · one palette and spatial hierarchy across three scales.

Motion & interaction

Animate meaningful changes; preserve orientation.

140 ms

Feedback

Button, chip, and focus response.

240 ms

Panel

Inspectors and sheets enter calmly.

800 ms

Scene focus

Move toward the selected entity.

1000 ms

Scene transition

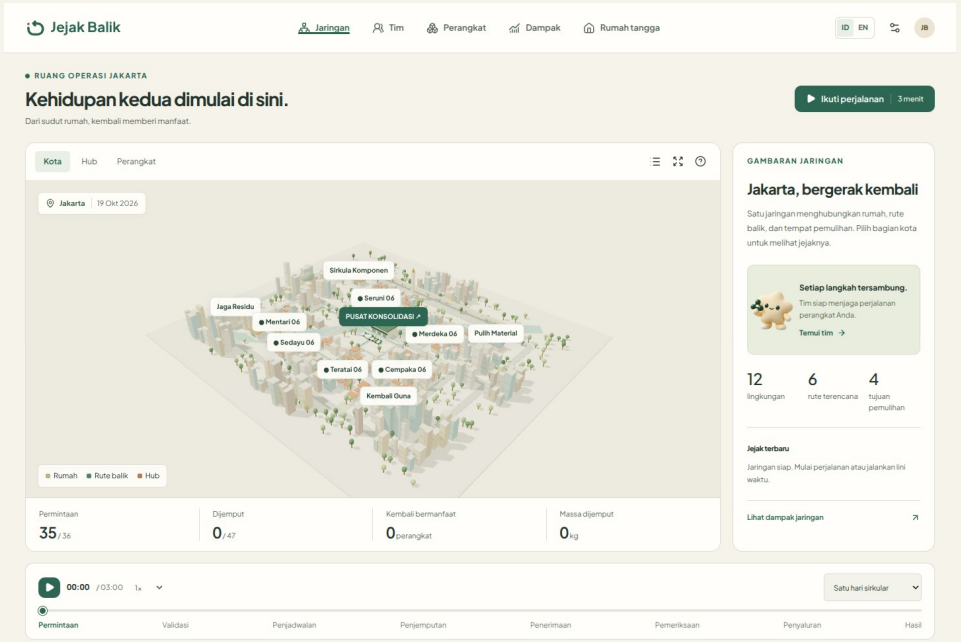

Change city and hub viewpoints.

Reduced motion

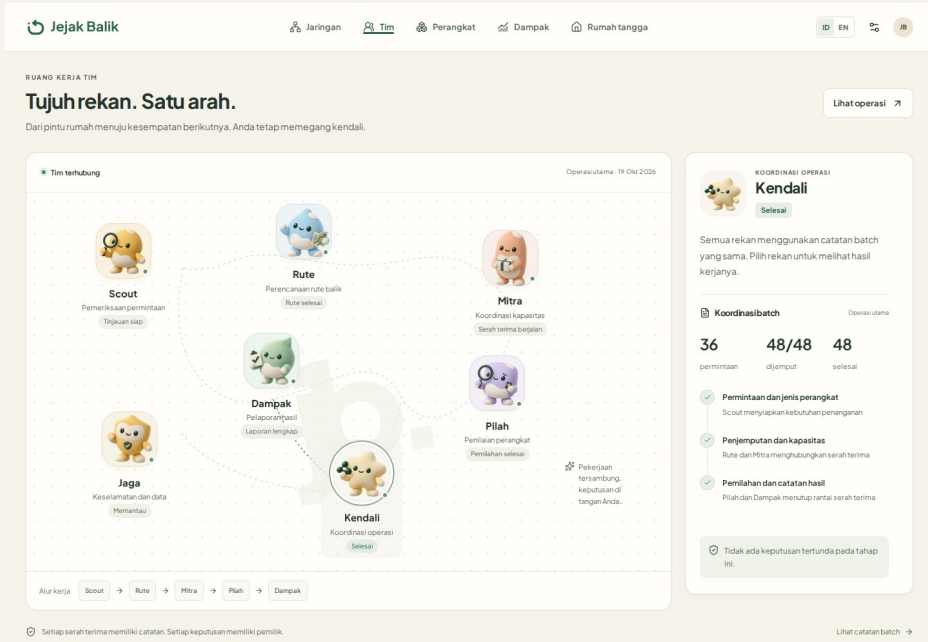

Use immediate state changes and static highlights.
Never hide status or progress behind animation.

Desktop application

The network and team, captured at different moments in the journey.

Twin Studio

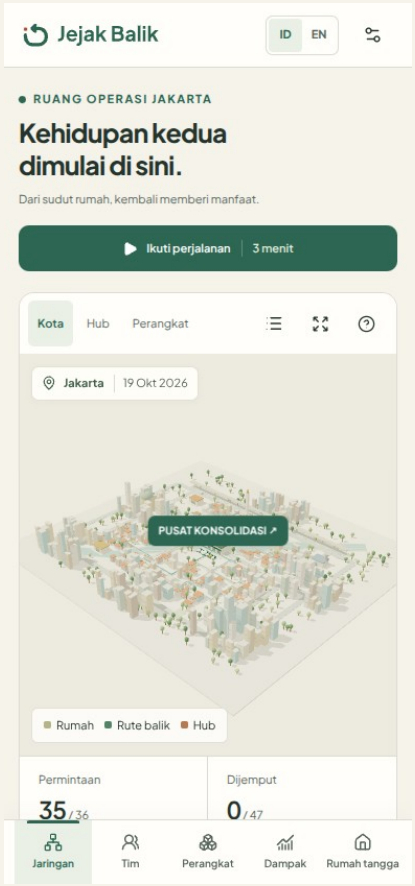

The operating team

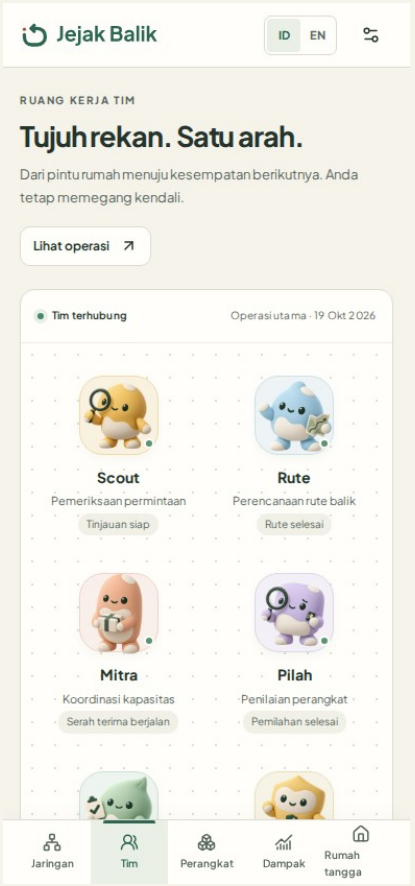

Selected entities connect the world, inspector, metrics, and operator actions.

Mobile application

The same journey, arranged for touch.

Responsive principles

Keep actions reachable.

Stack detail before shrinking text.

Use sheets for focused decisions.

Voice, assets & everyday use

Specific, brief, and honest about what happens next.

Say

“Penjemputan terjadwal, tanpa biaya.”

“Permintaan siap ditinjau.”

“Tinjau penanganan baterai.”

Use

SVG for interface logos
PNG for documents
WebP for character display
Local fonts + included licenses
Tokens for consistent components

Use: clear contrast and an intact return path.

Avoid: stretched marks or color-only status.
